UW Odegaard Undergraduate Library, OUGL 220

Do you want to make your humanities and social sciences courses more challenging? In this workshop, participants will learn how to introduce students to high-level academic conversations, writing, and research, allowing them to define their own inquiries while also presenting them with new, rigorous intellectual challenges. The presenters will share how they present these challenges in both an English/Language Arts and History/Social Science curriculum, in a way that allows for differentiation and student choice. Participants are encouraged to bring their own curriculum, and will work with peers to discuss changes that they can make within their own instruction using the strategies that are shared.
