

Challenging Advanced Learners using Hi-Cap Plus Professional Development Modules

Dr. Nancy B. Hertzog

9am – 3pm, Tues. June 30th – Wed. July 1st, 2020
UW Seattle Campus

Teachers are busy! What do they really need to best adapt their curriculum and provide a learning environment that maximizes students' growth and potential and strengths? We will share research-based on-line teaching modules, funded and supported by the Hi-Cap Plus Grant from OSPI, that focus on the essential elements of gifted education: classroom environment, adapting curriculum, assessment, inquiry-based instruction, and eliciting creative productivity. Teachers will learn how to organize their environment for differentiation, assess ongoing learning needs, adapt curriculum for depth and complexity, and engage students in creative and critical thinking through inquiry approaches. Most importantly, the presenter will share how these on-line professional development modules may be facilitated and used by any teacher, gifted education coordinator, or administrator to further equity and enhance instruction for all learners in their districts.

Pedagogies and
Strategies that
Enhance Learning
for Highly Capable
Students

Registration:

Online Beginning March 1st

\$200.00/Person

*Administrators' fees are waived with at least
three registered teachers from their district*
